- . Maintain our high level of integrity.
- . Value and appreciate our Staff, Customers and Community.
- . Acknowledge and learn from our challenges and successes.
- . Be an innovative influence within our industry.

VALUES

- . Maintain a high level of integrity.
- . Consider the well-being and safety of our staff.
- . Strive to meet the unique requirements of each customer.
- . Communicate on all levels.

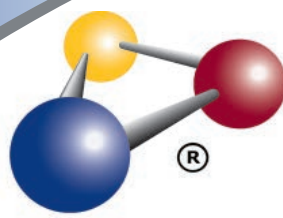

SYMBIO AUSTRALIA
TOTAL HYGIENE SOLUTIONS

READY TO USE

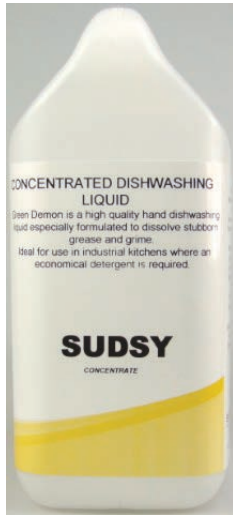

FEATURES AND BENEFITS

Mixed at factory to ensure correct dilution rate.
Hazardous product such as oven & grill cleaner does not have to be decanted from a larger pack. This means a greatly reduced chance of product spills, splashes, incorrect dilution and the accidental mixing of chemical dilution creating safer workplace.
Product is ensured to be correctly labelled including colour coding, Directions of use and safety information

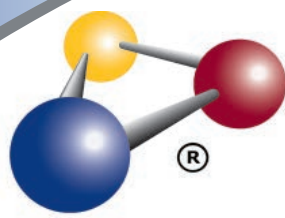

2L CONCENTRATE

FEATURES AND BENEFITS

- Double concentrated product
- Requires minimal storage space
- Premium product, Gets the job done the 1st time
- User friendly, Very easy to use colour coded system
- Reduces product wastage by eliminating traditional dilution methods
- Dispensing system does not require any plumbing
- Environmentally friendly as packaging and weight is significantly reduced

SYMBIO AUSTRALIA
TOTAL HYGIENE SOLUTIONS

stains from crockery, glassware, tea & coffee pots,
leaving them streak free & sparkling.

A concentrated bactericide destroys
disease causing germs quickly

AUTOMATIC DISHWASHING LIQUID DISPENSERS

Designed to automatically dispense detergent and rinse aid into dishwashers. We can supply a varied range to meet all customer requirements for any dishwasher you need from under counter units to fully automatic conveyer systems. Symbio modifies all units before installation to facilitate what we refer to as Quick Connect. This enables sales and service staff to quickly replace the unit which means faster customer operation.

MANUAL DISHWASHING LIQUID DISPENSERS

There are a variety of options including hand-pumping units with adjustable volume control and slow release options which prevents repeated adding of detergent. To fully plumbed in systems which mix a pre determined amount of detergent with water as it is added to the sink. There is also a dual unit which allows sanitiser to be added to the second sink where required.

WATERFED HOUSEKEEPING DISPENSERS

These units are designed to allow the mixing of detergent and water at the same time to fill either a mop bucket or trigger spray bottles. We carry a variety of units ranging from single dose bottle or bucket fill through to combination units, which carry 4 different chemicals into bottles and also give you the option of bucket fill.

WATERLESS HOUSEKEEPING DISPENSERS

These units are designed to allow the dispensing of pre measured detergents into a bottle, sink or bucket and then allow the user to fill with water. The advantages of these units are that you need no water or plumbing and have less stringent council requirements as no back flow to the water supply can happen. This also means that they can be installed in any location that best suits the Customer needs

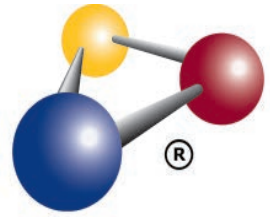

HAND SOAP DISPENSERS

Liquid, spray, foam soap or gels - this multi-purpose dispenser works with more hand care products than any other on the market, and uses interchangeable pumps to allow perfect dispensing of a variety of products. You can also choose to dispense soap from a refillable reservoir, or fit disposable soap cartridges or pouches. The clever 'arm-lever-free' design reduces SKUs, minimises dirt traps and makes the dispenser much more durable.

MISCELLANEOUS ITEMS

Symbio can also supply a large range of manual dispensing options from taps to hose attachment foaming guns. If we don't have we can most likely source it for you so please check with your representative.
